Reptilians

Version 1.2
Date: 09/10/2019

In ages past the world was carpeted in steaming jungles, from which volcanoes rose upon plumes of fire, and rivers of molten lava flowed to the boiling sea. While continents ebbed about the globe, buoyed upon the earth’s cooling mantle, it’s first great civilisation took root and flourished. All this was untold millions of years ago, and that ancient civilisation and its peoples now endure only as a remnant, deep within the equatorial jungles of a world grown cold: a world now dominated by newer and infinitely more rapacious species.

Yet even today, the God-Emperor of that primal race sits upon a golden lily pad and watches the world through weary eyes. He - if indeed that bloated creature is a he at all - watches and waits. His squamous warriors safeguard the preternatural wisdom of ancient days: dark and subtle magicks, the power to traverse the void between stars, the mastery of ethereal travel, and a thousand more half-forgotten secrets besides. Wealth they have beyond imagining: gold and diamonds, rubies and emeralds; nevertheless, what care they for such baubles who possess the wisdom of a hundred thousand generations?

Or so the legends tell... Here we have a list based upon humanoid reptiles, possibly amphibians, and maybe even fish. All three have some tradition in role-playing and other games and various manufacturers have produced ranges over the years. Lacking a root in genuine myth they likewise lack a common descriptive term, but we might call them lizardmen, frogmen, or by any of the names coined by the producers of models of this type.

Our core warriors will therefore be human-sized - or thereabouts - whether amphibians or reptiles. We’ll build our list around the idea of a long isolated civilisation such as might once have been imagined to lie within the jungles of Africa or South America. As such we take some inspiration from adventure stories that picture a ‘Lost World’ of prehistoric reptiles. Amongst our sources we find Sir Arthur Conan Doyle, Edgar Rice Burroughs, ‘The Land That Time Forgot’, and the many films, literary spin-offs and games based upon these ideas.

The same tradition gifts such creatures with preternatural knowledge, powers as old as the world itself; we are familiar with such things in the form of the Cthulhu mythos and the stories of Robert E Howard. Rather than adopt names or titles based on one source I have kept the descriptions of our creatures as generic as possible, leaving it to players to adapt such things as they see fit.

Variation in the size of models from different manufacturers has encouraged us to include both ‘human’ sized lizardmen and slightly smaller creatures of similar ilk, once again whether true reptiles or amphibians we do not know: perhaps they are immature versions of the human-sized critters. We have settled upon the word Eft to describe the smaller types: the Middle-English word from which our own word ‘newt’ is derived. Players can easily build a force exclusively from one type or the other, or mix the two, depending on your own back story or setting. The entries for Chieftain, Heroes and Priest can recruit from (past and present) it would surely be remiss not to do so. Although these are imagined to be larger, more primitive reptilians, they could also be giant apes or bears - whatever models happen to be available will fit the bill.

We’ll also extend a welcome to a larger, ogre-equivalent Saurian creature, because with all the world’s jungles to recruit from (past and present) it would surely be remiss not to do so. Although these are imagined to be larger, more primitive reptilians, they could also be giant apes or bears - whatever models happen to be available will fit the bill.

We’ll give our force cavalry mounted upon (probably) reptilian steeds, which I’ve called Scaly Beasts. These might resemble raptor dinosaurs or possibly something with four feet more firmly planted on the ground: perhaps a crocodile or alligator. Either way, they come with many teeth, sharp claws and those mean reptilian eyes that suggest you are about to become their possessor’s latest meal. If they happen to be gigantic frogs or flightless birds we shall embrace them with equal cheer.

We’ll also extend a welcome to a larger, ogre-equivalent Saurian creature, because with all the world’s jungles to recruit from (past and present) it would surely be remiss not to do so. Although these are imagined to be larger, more primitive reptilians, they could also be giant apes or bears - whatever models happen to be available will fit the bill.

Smaller, wolf-sized reptiles give us something like a pack of fighting war-hounds. These might be any of a number of smaller dinosaurs, crocodiles or prehistoric beasts right up to the age of sabre-tooth cats. They could even be tropical insects - millipedes of impressive length and mighty mandibles - whatever appeals.

Some of our cold-blooded combatants are fortunate to ride to battle not upon anything as mundane as an elephant, but upon the backs of gigantic reptiles: perhaps a sauropod such as brontosaurs, armoured beasts like stegosaurs or one of the many horned dinosaurs. The ready availability of plastic kits or the better quality toys makes all these possible, so we shall not worry about being too specific. A gigantic tortoise, mammoth or prehistoric rhino would not be too out of place either. Whatever form our great beast takes, the addition of a howdah and crew will make a splendid centre-piece for the army.
Our forces are not entirely earth-bound, but can soar above it upon the scaly wings of prehistoric reptiles, for what lost world would be complete without its pterodactyls? Once again, if players prefer to substitute birds of prey, gigantic parrots, or some other monstrous flying beast of uncertain parentage and dubious aerodynamics that is up to them. As well as allowing for units of flying reptiles we have given the option of having flying Eft riders; though once again we would be happy to see them aboard huge parrots or whatever takes your fancy.

A swarm has been included; further swarms can be added from the monster list in the usual way of course. Our bespoke swarm is described only as Slimey Things and is based on the existing swarm for frogs, toads and such-like, but it could equally well be a swarm of lizards, snakes, or other beasties.

Summary section at the end for stats.

### SOME SPECIAL RULES FOR REPTILES

#### Blowpipes

Blowpipes feature in several commercially available ranges and echo the ‘South American’ theme, so we shall make allowance for them. We assume that darts - though tiny - are tipped with some deadly or noxious concoction. This give units so equipped the venomous special rule when shooting, meaning that if the target takes at least one hit it automatically suffers one extra hit in addition. In case you were wondering, blow pipes are not hand hurled weapons and so can’t be used in an exchange of missiles by a unit that is charging. The blowpipe is costed at 2pts. See the Summary section at the end for stats.

#### Bolas

The real bolas is used to bring down game animals or cattle and we introduce it here because of its association with South American cultures such as the Incas. The same rule will hold good for any similar thrown weapon designed to entangle a target such as a lasoo, lariat or net - but here we’ll think in terms of a weighted bolas. The bolas is a hand-hurled missile weapon that can only be thrown as part of an exchange of missiles. Hits from a bolas cause no damage, but inflict a pin on the target in the usual way.

In addition, if the target is a warrior or mounted unit, make a D10 test against the total number of bolas hits scored. If successful then 1 opposing model cannot strike otherwise agreement before the game no penalties to movement apply to such units when travelling through water.

If a target unit has the aquatic rule, any shooting hits upon models positioned within water must be re-rolled. Targets duck beneath the surface to try and avoid being hit. See page 29 of the rulebook for a description of how re-rolls work.

#### Optional Aquatic Rule

If a unit has the aquatic rule then the following extra movement rule can be used to represent units that are under water:

This is an entirely optional rule because I fully realise it might well pose problems in some situations or set-ups. If you don't get on with it don't use it, improve it, or write your own!

Note: I have not considered the possibility of ‘bolasing’ monsters, chariots or the like. Aside from complication when it comes to the effect on crews and such, it seems unlikely a vast monster or construction would be all that inconvenienced. Players who feel inspired to overcome these challenges are welcome to improvise rules for themselves. Nor have I worried about spectral targets that are otherwise affected by shooting attacks - let all be affected in the same way and we have a straight-forward rule that can be applied in general play.

#### Cold-Eyed

Cold-eyed is a new special rule that applies to all Lizardmen and Efts; cold-blooded creatures not easily stirred by adversity. This is costed as 1pt per model.

When taking any test against Command the unit ignores the usual -1 penalty applied for one pin. So, 1 pin would impose no penalty, 2 pins a penalty of -1, 3 pins -2 and so on. When making an Order test, a test is still required if the unit has a single pin, even though the usual -1 penalty is ignored and the test made against the full Command value.

#### Aquatic

I’ve added this special rule to take account of forces that are more obviously amphibian, fishy or ‘turtle’ type creatures, and included it as a free option for most of the infantry units in this list. It is a situational rule, and in many games it is therefore of no practical value: hence no cost. It’s useful for scenarios where a substantial portion of the tabletop takes the form of contiguous water. For example, a Lizardman temple complex where buildings rise from surrounding canals and waterways, or a swamp where jungle islands emerge from the surrounding water.

If a unit has the aquatic rule then it can always traverse water features as if they were open ground. Unless otherwise agreed before the game no penalties to movement apply to such units when travelling through water.

If a target unit has the aquatic rule, any shooting hits upon models positioned within water must be re-rolled. Targets duck beneath the surface to try and avoid being hit. See page 29 of the rulebook for a description of how re-rolls work.
If all the models in the unit move into, or remain within, the same body of water the player can declare they are submerging after their order has been enacted. Remove the models but leave their order dice in place, retaining any pin markers the unit has. Mark the spot with a suitable counter, substituting the counter for any model you have removed. A lily pad makes a nice counter and can be made from card very easily.

Remove the unit's order dice at the end of the turn as usual but leave the counter in place. During subsequent turns when the unit receives an order you can either place a further counter in the same spot together with the order dice, or reveal the unit as described below. If you fail an order test whilst submerged the unit must remain submerged; you can't reveal the unit and must place a further counter instead.

Units wishing to remain submerged can be given any order in the usual way, but do so purely for form's sake. If they have pins an order test is required, and pins are removed in the usual way once the test has been made. Hint - this means a rally order is often the best choice for such units. Submerged units are effectively 'off the table'; they take no part in the game and are not affected by weapons, spells or anything else regardless of whether their counter stack lies within an area of effect or otherwise. They cannot be targeted by missiles, spells or a charge; they cannot shoot, make any special attacks, hurl spells or otherwise participate in the game aside from taking order tests and removing pins where they otherwise would.

When given an order a submerged unit can resurface at any point in the same or contiguous body of water before enacting the order. Declare you are surfacing. Measure the unit's new position from the first counter placed. Each counter in the stack counts for 10" of movement through the water, except for the counter immediately under the new point from the first counter placed. Each counter must be within 20" of the counter immediately under it. Once the test has been made, the rest are placed within the distance allowed from the counter, in formation and within the water.

When units surface they enact the order they have been given in the usual way. For example, they can potentially move and shoot, or they might run and charge into hand-to-hand combat, and so forth.

A unit cannot surface and submerge as part of the same action. A unit emerging at the start of its action isn't able to submerge again once its order has been enacted.

Comment: I'm embarrassed to have written such a long-winded rule but there you are - when you start to consider such things even a simple idea takes a bit of explaining. I created this rule for a very specific scenario in which Conquistadores battled Aztec toadlings over a temple complex and thought it was too much fun to miss out. Also, it is easier than it sounds, honest.

There are two new weapons to consider: the bolas and blowpipe. The blowpipe is a fair alternative to the javelin for smaller units, where the potential for an extra hit makes up for the lower strike value. The bolas is something of an oddity in so far as it is a missile weapon that causes no damage - not generally a good thing to be honest! However, the opportunity to entangle an enemy is enough to make warlord and hero units think twice; apart from this, the chief advantage is to inflict a pin during the exchange, which it does relatively cheaply.

I decided against providing stats for Eft character types because I didn't think it necessary in a list that is already pretty big. The stats as given are based on the reptilian versions, but will also cover the smaller Efts if we assume their high-ups are a little larger and more powerful than the common spawn.

I have given a choice of crew for the Great Scaly Beast and adjusted their points values according to their relative Strengths, which seemed only fair. I have yet to try out a GSB with either a full or reptilian crew, but don't anticipate any issues compared with other critters such as Mammoths.

As Always And I'm Sure I don't Need to Say This

Warlords of Erehwon is an open system that I created so that I could play the kinds of scenario based games I enjoy; using my existing collections, those of my friends, and such models as we care to collect. The game is not tied in to any particular manufacturer's offerings and is designed in such a way that you can change, expand, or add new rules to take account of specific elements that you might wish to include.

You don't have to use these army lists if you prefer not to do so, and you are not bound by any of my restrictions or options should you prefer to do something else. Wargaming is a hobby that allows us to sort things out between ourselves, and if players wish to incorporate new elements or rules then all they have to do is agree to do so. I often do just this - changing rules and adding new bits for a game is all part of the fun.
## REPTILIAN CHIEFTAIN

**Warlord Warriors Unit**  
**Points Value:** 106

**Special:** You must include one of Reptilian Chieftain, Mounted Reptilian Chieftain or Reptilian Chieftain in Chariot unit in your warband and one only.

<table>
<thead>
<tr>
<th>Unit: Reptilian Chieftain</th>
<th>Ag</th>
<th>Acc</th>
<th>Str</th>

- Add up to 5 Reptilians with bows @15pts each
- Give unit Aquatic rule @Free
### Reptilian Warband

#### Reptilian Warband

**Unit:** Reptilians with Slings  
**Points Value:** 92

| 1 x Reptilian Leader with sword or axe, sling | 6 | 5 | 5 | 6 | 8 | Tough, Cold-Eyed |
| 4 x Reptilian with sword or axe, sling | 6 | 5 | 5 | 6 | 7 | Cold-Eyed |

**Options**

- *Give unit light armour @2pts per model increasing Res to 6(7)*
- *Give unit Aquatic rule @Free*
- *Add up to 5 Reptilians with slings @16pts each*

#### Reptilian Warband

**Unit:** Reptilians with Blowpipes  
**Points Value:** 87

| 1 x Reptilian Leader with sword or axe, blowpipe | 6 | 5 | 5 | 6 | 8 | Tough, Cold-Eyed |
| 4 x Reptilian with sword or axe, blowpipe | 6 | 5 | 5 | 6 | 7 | Cold-Eyed |

**Options**

- *Give unit light armour @2pts per model increasing Res to 6(7)*
- *Give unit Aquatic rule @Free*
- *Add up to 5 Reptilians with blowpipes @15pts each*

#### Reptilian Warband

**Unit:** Reptilians with Javelins  
**Points Value:** 87

| 1 x Reptilian Leader with sword or axe, javelins | 6 | 5 | 5 | 6 | 8 | Tough, Cold-Eyed |
| 4 x Reptilian with sword or axe, javelins | 6 | 5 | 5 | 6 | 7 | Cold-Eyed |

**Options**

- *Give unit light armour @2pts per model increasing Res to 6(7)*
- *Give unit Aquatic rule @Free*
- *Add up to 5 Reptilians with javelins @15pts each*

#### Eft Warriors

**Unit:** Eft with Swords  
**Points Value:** 47

| 1 x Eft Leader with sword or axe | 6 | 5 | 4 | 4 | 7 | Tough |
| 4 x Eft with sword or axe | 6 | 5 | 4 | 4 | 7 | 7 |

**Options**

- *Give unit spears @Free per model*
- *Give unit huge sword or big axe @Free per model*
- *Give unit bolas @1pt per model*
- *Give unit light armour @2pts per model increasing Res to 4(5)*
- *Give unit medium armour @4pts per model increasing Res to 4(6)*
- *Give unit Aquatic rule @Free*
- *Give unit Cold-Eyed rule @1pt per model*
- *Add up to 5 Eft warriors @7pts each*
## EFT WITH BOWS

</tbody>
</table>

**Aquatic.** No penalties for movement within water and re-roll shooting hits against targets in water.

**Cold-Eyed.** Pin penalties to Command are reduced by 1.

**Command.** Friendly units within 10” can use the model’s Co stat to take Command based tests.

**Dead Eye Shot.** Re-roll 1 missed shot from unit.

**Disciplined.** Lose all pins when pass a Rally test.

**Divine Intervention.** Can steal an order dice from an enemy unit within 20” with successful Command test. If fail take 1 pin instead.

**Dread.** -1 to hit shooting/close combat. -1 to break test if defeated by dreaded enemy.

**Hero.** Friendly units within 10” can use the model’s Initiative stat to take Reaction tests.

**Fast/Slow.** Move at the basic rate indicated.

**Flies.** Moves over any terrain/obstacles without test or penalties. Enemy cannot charge/countercharge or follow-on in combat unless they can also fly or if flyers are down.

**Follow.** Friendly un-pinned units within 5” can follow the unit’s order immediately.

**Frenzied Charge.** +1 extra Attack when charging.

**Irresistible Charge.** D3 SV bonus when charging.

**Large.** +1 to hit shooting. Can draw LOS to body. Can draw Los over non-large models.

**MoD2.** Unit has 2 order dice.

**Rapid Sprint.** Sprint at 4M.

**Savage.** Re-roll missed Str to hit in first round of combat in game.

**Spirit.** Can be sacrificed for a re-roll. Destroyed if wizard is slain.

**Stampede.** Stampede on failed Order test of 10. D10”+2M in direction shown by dice. Each unit in path is attacked as if charged. Unit goes down and gains 1 pin per unit trampled.

**Stealthy.** Re-roll shooting hits on unit if in cover.

**Surly.** Cannot benefit from Command, Hero or Follow rule.

**Tough.** Re-roll a failed Res test (Tough 2 re-roll 2 separate fails, and so on).

**Venomous.** If one or more hits is scored on the target then one extra hit is added automatically.

**Woodsmen.** Difficult terrain counts as open. Add +1 cover bonus in woods.

**Wound.** Can lose the ‘wounds value’ of lives before a further Res fail slays. Can’t recover pins beyond wounds suffered.
